PROFESSIONAL SUMMARY

Senior Full Stack Developer with 4.5+ years building enterprise-grade React.js/Next.js/Node.js applications for 100K+ users. Delivered 40% UI performance gains, scaled test coverage from 60% to 90%, and engineered AI-powered features using OpenAI API and LLM workflows. Deep expertise in frontend architecture, SSR/ISR, state management, performance optimization, and shipping complex systems in fast-paced Agile environments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, React Query, Tailwind CSS, Material UI, SSR/ISR

Backend & Database: Node.js, Express.js, Spring Boot, REST APIs, GraphQL, Microservices, PostgreSQL, MySQL

Cloud & DevOps: AWS (EC2, S3, Lambda, Elasticsearch), Docker, CI/CD, Redis, Webpack, Vite

AI & LLM: OpenAI API, Generative AI, Prompt Engineering, LLM Workflows, GitHub Copilot

Testing & Tools: Jest, React Testing Library, Git, Jira, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Developer | Wipro

Bengaluru, India • July 2025 – Present

- Architected a healthcare-grade NPI Access Management platform using Next.js (SSR/ISR), TypeScript, and Spring Boot REST APIs, establishing a reusable component library and design system that enabled secure role-based access workflows for 50K+ users.
- Engineered a scalable frontend architecture with reusable component systems, dynamic form orchestration, and real-time validation, accelerating feature delivery velocity across product teams.
- Mentored a team of 3 junior developers on React.js architecture, TypeScript best practices, and performance optimization, improving code quality and engineering standards across the team.

Software Developer | Deltek Replicon

Bengaluru, India • Oct 2021 – July 2025

- Promoted to SDE 2 (Oct 2024) for technical ownership, cross-team leadership, and consistent delivery of high-impact features across Polaris and Time & Attendance platforms.
- Delivered 6+ major features improving system performance by 30% for a 100K+ user base; led development of Overtime, TimeOff Approval, and Rest Day Assignment workflows using React.js and Node.js/Express.
- Boosted UI performance by 40% via virtualized lists, optimized Redux state management, and elimination of unnecessary re-renders, improving Core Web Vitals and user engagement.
- Built enterprise Scheduling UI with a Node.js/GraphQL backend supporting drag-and-drop, virtualized lists, and bulk operations; leveraged AI-assisted tooling to accelerate complex state logic development.
- Scaled test coverage from 60% to 90% using Jest and React Testing Library; drove code reviews and improved debugging and component design practices across the team.

KEY PROJECTS

Meeting Memo Studio *Next.js 14, TypeScript, Tailwind CSS, OpenAI API, Groq*

• GitHub: github.com/sahilraj3019/meeting-memo-studio

- AI-powered synthesis platform transforming raw meeting transcripts into structured summaries, decision logs, and action items, built with JSON-mode LLM integration and custom TypeScript schema normalisation for reliable structured outputs at scale.

Fashion Shot Generator *React.js, TypeScript, TensorFlow.js, PoseNet*

• GitHub: github.com/sahilraj3019/fashion-shot-generator

- In-browser ML pipeline using TensorFlow.js and PoseNet for key point detection to automate garment region extraction from fashion images, enabling near real-time cropping with zero backend ML dependencies.

EDUCATION

B.Tech, Computer Science & Engineering

Mahatma Gandhi Central University, Motihari

Sep 2017 – Aug 2021
